Nardella's Case.

Nardella the Italian conflued in Jall on the charge of the murder of Rotunne, denles having murdered De Balbo at North East, Md. He admits knowing be Balbo's son. He still adheres to his stery of having had two accomplies in the Rotunno affair. It is thought that he desires to impress the authorities with the fact that he was not the principal in it. He is aware that in Italy immunity is given an accomplice to turn state's evidence, and he is believed to be playing this game and implicating two very strong witnesses against him, who are possessed of facts that are damaging to him. The same witnesses were instrumental in his arrest. Nardella's Case.

Mr. Jordan's position is that the contract gives the Adams Express Company preference over all other companies, but does not pre-clude the government's transporting its own money in government vessels. Moreover, it is thought that the contract might be open?s objections upon the ground that it is against public policy.

Some of the wood is dramaged, and he will recommend that about one-half of it be sold if it brings no more than \$75 per thousand. He supposes the damaged periton has been thrown aside, a plank at a time, from different lots. He does not desire to convey the bleat that two big prices have been paid or that his predecessor has been purchas-ing imperfect material.

NAVY YARD ACTIVITY.

Washington Preparing to Build Big Guns and Ready to Construct Cruis-

dates for the position of foremen at the Washington navy yard has been completed. There were about twenty-six candidates examined, including all the foremen now employed in the yard. The board of examiners are naval officers stationed at the yard. Their report of the candidates passing a satisfactory examination has been sent in. From this list the Secretary of the Navy will be able to select persons for the various foremanships. It is learned that many of the foremen of the navy yard bave passed creditable examinations. The Secretary will make quick work in the appointment of the foremen. As soon as the yard is reorganized active work will be tegun. Orders will be sent from the Navy Department in a few days directing that work shall be resumed at all the navy yards. employed in the yard. The board of ex-

work shall be resumed at all the navy yards.

Already work has been begun in the yards at Mere Island and Brooklyn. At the remainder of the yards it will be begun as soon as the reorganization of the forces has been completed. The appointment of new forces it is expected will be made in a short time at the yards where they have not yet been made. On June 1 many men were discharged because of lacks of funds to continue work. The opening of the new fiscal year made a fresh appropriation available with which work can be continued, and ofters an opportunity for furnishing employment.

Cemmodore Semmes, of the Washington may yard, stated to a reporter of Tift Returnican has inght that the examinations were completed at the yard. There were

were completed at the yard. There were comparatively few applicants. No orders had been sent him as yet to employ more men. There are about 500 men employed in the yard now, exclusive of the clerical force. He did not know of any increase in work.

work.
A specialty was being made in making sails. The Washington navy yard has always been the lowest bidder in sailmaking of all the competing navy yards.

Preparations were being made for the manufacture of 16-inch guns. There was no positive assurance that they would be manufactured at the navy yard, but in order to be prepared the opportunity for estimate the construction.

monufactured at the navy yard, but in order to be prepared the opportunity for getting ready was being taken advantage of.
Should orders be received to make these
guns an extra force would be employed.
The facilities for salmaking at the yard are
unsurpassed, and the very best work is
turned out.

Commodore Scmmes stated further that
the navy yard could in a little while be
made into a shipyard, and the very best
steel cruisers could be built there. The
best workmen could be found here, and the
very best work would be done. There were
no political workmen or "bummers" employed in the navy yard. He did not know
anything about the rumor that machinery,
&c., would be made at the Washington
yard for the men-of-war to be repaired at
Brooklyn. He hoped, however, that plenty
of work would be found for the mechanics
now in need of employment.

A VETERAN OFFICER'S VIEW. The Folly of Sending a Single Policeman in Private Clothes to Capture Roughs.

"The papers ought to say something about the way policemen are sent out on their beats with imperfect instructions?" remarked an ex-policeman yesterday. What do you mean ?" asked a reporter

for THE REPUBLICAN. "Simply this, that a licutenant who will send an offiser alone in a locality to break up a gang of rowdles or thieves in citizen's up a gang of rownes or there's in citizen's clothes does not know his business. When that officer goes out he does not know what is before him in the way of trouble. Single-handed, he is Tikely to get his head knocked off, especially in the first precinct, where there are some colored roughs of the worst character. I do not know of a precinct, where there can be found a of the worst character. I do not know of a precinct where there can be found a worse element. Both men and women free alike, The ignorant class of them when inaddened set like enraged bulls. A Heutenant who knows the danger of such a mission, and sends an offlicer out to accomplish work that he himself with a whole squad of men should do, is guilty of a wrong. If offleer Shehau had been sent out with a fellow officer, and the officers in the adjoining beats notified of their mission, so go to be in easy calling disofficers in the adjoining beats notified of their mission, so as to be in easy calling dis-tance, there would have been no trouble. I know that it is impossible for an officer in uniform to get upon rowdies, but I think it is a palpable wrong to send a man, how-ever game, into a locality known to be the resort of cut-throats and thieves."

Overcome by Escaping Gas. John Raney, an employe of the gas company, went into the cellar of Connell's saloon, on better, near Tenth, last night, to repair a leaky gas meter. He was overcome by the escaping gas, and taken out by F. J. Hickey in an inscasible condition. At the Emergacy Hospital restoratives were given him, and in less that two hours afterward he walked to his home, 47 G street.

SUMMER NOVELTIES!

Most stores at this season are completely out of anything worth having. As a rule you will find only old stock on hand which merchants are anxious to dispose of before they purchase new. It is not the case with us, however, for we had so small a stock when the summer season opened that we were obliged to replenish it at once; and as trade has been unusually good during the warm spell we have found it necessary to send cur buyers to New York oftener than we ever have before at this season of the year. We wish to call your attention this week to

FOOLS.

Not all the fools in town wear "caps and bells;" but if the foolkiller should come around suddenly, as the dog-catcher does, there'd be a hurrying to and fro, and gathering tears, and tremblings of distress." We all know "lots of 'em." We see them singly, in pairs, and in "job lots," and it was this ability to see them that caused the poet to write: "He who would not see an ass, must blde at home, and bolt his door, and break his looking-glass."
